

JOURNEY

SYSTEMS

Journey Systems is a locally owned and operated small business, founded in 2006 in Milford Ohio. Our company works directly with everyone from home users, to school districts, to universities, to defense contractors and government agencies.

Our focus is building custom, specialized machines that meet customer requests, including everything from personal desktops, to laptops, to a vast range of servers. We build servers from the 1U range to the 5U range, and also have our own custom chassis. Our machines are built for durability and high performance with a 3 year warranty.

Our office offers support via hands on, phone, or internet on all of our units. We provide extended support service for our defense contractors.
